- **Version Control System:** Git, GitHub

## EDUCATION

---

### Bachelor of Computer Application

oct 2021 - Jul 2024

Sankalchand patel University Visnagar, Gujarat

- Cumulative CGPA: 7.83

## ACADEMIC PROJECTS

---

### Helping Hands

Mar 2024

Sankalchand Patel University Visnagar, Gujarat

#### PHP | JavaScript | MySQL

- Home Service designed involve to bridge the gap between skilled service providers and homeowners by offering a comprehensive platform that addresses a wide array of residential needs.
- It facilitates seamless coordination of essential tasks, such as plumbing, electrical repairs, deep cleaning, appliance maintenance, and general home upkeep.
- Users can easily schedule appointments, track service progress in real-time, and receive notifications.

## PERSONAL PROJECTS

---

### Mega Blog

June 2024

React | Tailwind | Appwrite | TinyMce | Redux | React-hook-form

- Designed and built a comprehensive blogging platform with React, focusing on robust content creation and media management features .
- Optimized the user interface for a smooth, responsive experience on all devices, ensuring accessibility and ease of use.
- Implemented Redux Toolkit for efficient state management and used React Router Dom to enable intuitive, seamless navigation
- Gathered and analyzed user feedback to continuously refine and improve platform functionality, enhancing user engagement.

### **Portfolio Website**

May 2024

#### **React | Tailwind | GitHub Api**

- Created a dynamic portfolio website using React, React Router DOM, and the GitHub API.
- This project showcases various functionalities such as fetching user data from GitHub, displaying profile information, and providing an interactive user experience with routing and state management.

### **Weather APP**

May 2024

#### **React | Tailwind | Ninjas Api**

- Developed a dynamic weather application using Fetch API to retrieve real-time weather data.
- The app provides comprehensive weather information, including: Wind Degree, Wind Speed, Sunrise Time, Cloud Percentage, Feels like, Humidity

### **Password Generator**

April 2024

#### **React | Tailwind**

- Developed a secure and customizable password generator using React, featuring
- real-time password updates based on user-defined length and character preferences.
- Integrated useCallback for optimized function handling .
- useEffect for responsive side effects, and useRef for seamless copy-to-clipboard functionality

### **Certification**

- Data Structure and Algorithms in JavaScript by FreeCodeCamp July 2023
- Introductions to Networking by NVIDIA August2024
